GENERAL NOTES

The accuracy of the data presented in this drawing is consistent with the scale specified in the title block. Any dimensions taken from it will be within the tolerance associated with this and smaller scales only.

All control should be checked before use. All dimensions should be checked on site prior to design and construction. Any deviations or errors in the drawing should be reported to MG Surveys immediately.

Tree information presented should be used as a guide only. Species information cannot be guaranteed and should be verified by a qualified arboriculturist if critical.

Any drainage information presented has been inspected remotely and should be used as a guide only.

Physical features such as walls, fences and posts shown on drawings do not necessarily represent legal boundaries.
